

# HOW TO CARE FOR YOUR MENU COVERS

---

## CLEAN YOUR MENUS

Only use warm water or very mild soapy water (*10 to 1 water to soap ratio*) with a soft, damp (not soaking wet) cloth or sponge when cleaning your menu.

## WATCH THE TEMPERATURE

Keep your covers at room temperature whenever possible, and avoid leaving them near heat sources, refrigerated rooms, unheated supply areas or outside.

## STORE THEM PROPERLY

Make sure to store your menus flat atop one another, and keep the menu cover stacks small, as excessive dropping can diminish the life of cover use.

### NOTE

Do not use harsh chemicals, glass cleaners, abrasives, or bleach. Harsh chemicals destroy both covering materials and stamped images.
